

Test Filter

- What are we “testing”?
 - Size
 - Uniformity of transmission curve
 - Uniformity of wavelength cutoffs
 - Will we collect astronomical data?
 - Test our “test” facilities?
 - Contribute to vendor R&D?
- Considerations
 - Should we procure small versions to test filter prescription?
 - Align our specs with WIYN? Panstarrs?
 - Align our procurement cycle with WIYN?
 - Is there a “most difficult” filter to make?
 - Is there one filter that is most stringent for science?
